

genevalmag::Expr\_instance::to\_string

```
graph LR; A[genevalmag::Expr_instance::to_string] --> B[genevalmag::Attribute::get_name]; A --> C[genevalmag::Symbol::get_name];
```

The diagram illustrates a method call from `genevalmag::Expr_instance::to_string` to two other methods: `genevalmag::Attribute::get_name` and `genevalmag::Symbol::get_name`. The source method is highlighted in a grey box, while the target methods are in white boxes. Blue arrows indicate the direction of the call.

genevalmag::Attribute::get\_name
