

genevalmag::Attr\_grammar::get\_index\_eq\_with\_context

```
graph LR; A[genevalmag::Attr_grammar::get_index_eq_with_context] --> B[genevalmag::Expr_instance::get_attr]; A --> C[genevalmag::Expr_instance::get_num]; A --> D[genevalmag::Attribute::is_synthesize];
```

The diagram illustrates a central function call, `genevalmag::Attr_grammar::get_index_eq_with_context`, which is highlighted with a gray background. Three arrows originate from the right side of this central box and point to three separate target function calls arranged vertically to its right. The top target is `genevalmag::Expr_instance::get_attr`, the middle target is `genevalmag::Expr_instance::get_num`, and the bottom target is `genevalmag::Attribute::is_synthesize`. All boxes have black borders and the text is in a monospaced font.
