

genevalmag::Attr_grammar::get_index_eq_with_context

```
graph LR; A[genevalmag::Attr_grammar::get_index_eq_with_context] --> B[genevalmag::Expr_instance::get_attr]; A --> C[genevalmag::Expr_instance::get_num]; A --> D[genevalmag::Attribute::is_synthesize];
```

The diagram illustrates a central node, `genevalmag::Attr_grammar::get_index_eq_with_context`, which is highlighted with a gray background. Three blue arrows originate from this central node and point to three other nodes: `genevalmag::Expr_instance::get_attr` (top right), `genevalmag::Expr_instance::get_num` (middle right), and `genevalmag::Attribute::is_synthesize` (bottom right). All nodes are enclosed in black rectangular borders.
