

genevalmag::create_lit_str

```
graph LR; A[genevalmag::create_lit_str] --> B[genevalmag::Expr_literal::set_type]; A --> C[genevalmag::Expression::set_type_synthesized]; A --> D[genevalmag::Expr_literal::set_value];
```

The diagram illustrates a central node, `genevalmag::create_lit_str`, which is highlighted with a gray background. From this node, three blue arrows point to three separate white nodes. The top arrow points to `genevalmag::Expr_literal::set_type`, the middle arrow points to `genevalmag::Expression::set_type_synthesized`, and the bottom arrow points to `genevalmag::Expr_literal::set_value`. All nodes are rectangular with black borders.
